6500 m² to

“ Listen to our customers, analyze their expectations, determine their real needs, and bring THE global solution.” Thanks to the synergy of skills grouped together on the same geographic platform, ISI keeps the total control your project and is your unique contact from the design up to the commissioning and production start of your installation.

ISI provides you the power of its shop floor : 11 cranes from 5 up to 20 tons, transfer trolleys, packaging and conditioning, internal loading quay and a national and international network of logistic means.

It's purchasing department works in a design to cost logic, respecting reliability, safety and quality during the manufacturing process.

ON SITE COMMISSIONING

Our installation team composed of men speaking several languages giving you a security in terms of availability, dynamism and ability. All around the globe, ISI knows how to lean on local skills to optimize and start its installations and to set up after sales service.

PROJECT MANAGEMENT

The mission of the ISI project manager, your unique contact person is :

- to generate a production planning schedule
- to plan tasks and manage the resources
- to establish regular reports of the activities
- to centralize all information inherent to the project.

He guarantees the success of your project

DESIGN

Listening is essential to make a precise and specific analysis of your need written down in the technical specification. With the technical specification, our design department works out a custom made solution, a maintenance manual completes the whole definition of the installation.

PURCHASING AND LOGISTICS

The purchasing and logistic department works day to day to optimize costs and flow. ISI built a network of recognized partners in France and abroad. ISI guarantees good execution of conditioning of your product and is able to deliver all around the world.

FINALIZING

All our means, energy sources and equipments, associated to the qualification of our teams allows us to realize the assembly, Perform test runs and make adjustments on machines or production lines in our 6500 sq./m². Our energy sources allow us to perform test runs under the final operating conditions (standards CSA, UL, EU...).

A PARTNER' NETWORK

ISI QUALIFIED A NETWORK OF PARTNERS HAVING A KNOW-HOW IN MECHANICS, PIPING, CLIMATIC, ELECTRICITY AND ROBOTICS. THIS NETWORK ALLOWS ANSWERING TO STRONG FLUCTUATIONS IN WORKLOADS AS WELL AS HIGH TECH REQUIREMENTS AND SPECIFIC SKILLS. IT ALSO ALLOWS OPTIMIZED PRODUCTION COSTS, KNOWING THAT ALL PARTNERS, WHATEVER THEIR NATIONALITY, COMMITTED THEMSELVES TO RESPECT THE ISI CHARTER : "BE AS PERFECT AS POSSIBLE".
